

OrgHarvest has been approval by the Securities and Exchange commission as the first Cannabis cultivation company to set precedence and be approved for a REG “A”

Name: OrgHarvest, Inc. ("ORGHARVEST")

Industry: Agricultural, Health & Medicinal Cannabis

Geography: Las Vegas, NV. USA

OrgHarvest, Inc OTCIQ stock symbol "ORGH"

Seeks to launch Cannabis cultivation and production

in Las Vegas with a high-tech glass greenhouse of 100,000 square foot

imported from the Netherlands to produce 450 pounds of Cannabis flower a week and gross over

60 million dollars after the second year of operation.

OrgHarvest, Inc. is pleased to announce an approval by the Securities and Exchange commission as the first Cannabis company to set precedence and be approved for a REG “A” for 20 million dollars. Mr. Adesso from the law firm Waller Lansden Dortch & Davis, LLP was quoted as saying: “Our associates’ research has indicated that this is the first time in history that the SEC has qualified such a document filed by an issuer engaged in the cultivation of cannabis with no comments!”

The company offers 1 share of common stock at 25 cents with one bonus share of restricted stock for a limited time in its self-registration.

Focus: Acquisition, production, and/or joint venturing of Dispensaries and production of Oils that will be used in the manufacturing and distribution of edibles for beverages, cookies, gummies, pharmaceuticals, and cannabis flower with high THC values.

Competitive Advantages includes Company risk diversification through the approach to growing with a high-tech custom Dutch glasshouse manufactured in the Netherlands offers a unique combination of advantages that is unmatched by our competitors.

Compared to the other Cannabis options we differentiate ourselves by offering a

facility that can provide better quality flowers, pest free flowers, and a stronger focus on developing

strains and new products using our exclusive patent technology.

PRODUCTION System Operational Advantages:

- Increased production rate and volume efficiencies.
- Closed Loop Pressurized System.
- Zero Waste through a UV Water Re-Circulation System.
- Odor Remediation.
- Reduces production and maintenance costs.
- Lessens environmental health and safety concerns
- Environmental impact is lower using solar and renewable energy power off the grid.
- Extensive third-party testing and verification.

Efficient modern System improves production efficiencies of up to 50% lower pricing, and up to 80% lower operating costs than competitors.

Provides "value-added" technology allowing for increased production

Patent licenses for microbial disease prevention insuring safe organic crops.

Proven design, engineering, and production team for sustained technological performance of the cannabis PRODUCTION System. Experienced business management team to implement the companies' business strategy and objectives.

Management Team

Our management team and founders bring together a unique and diverse background of education, experience and expertise. Having an award-winning team behind OrgHarvest dedicated to strain development and organic production will be our key to creating high quality THC flower. All of the products we distribute must first pass all inspections by independent, third party testing facilities and internal inspections before being provided to our end users.

The ORGHARVEST management team has many years combined business experience, and is comprised of senior executives with a commendable track record in the technology industries.
