

AIXIN LIFE INTERNATIONAL, INC. ANNOUNCES WENTANG RICE DISTRIBUTION AGREEMENT

AIXIN Life International, Inc., a leading distributor of health care products in Sichuan Province, China, announced today that it has entered into a Distribution Agreement with Sichuan DoMiHui Trading Co., Ltd. whereby Aixin has been granted the right to distribute Wentang Rice throughout China. Wentang Rice was developed by Chengdu Tianjianjun Agricultural Science and Technology Co., Ltd. for use by diabetics to help control their blood sugar levels.

Tests conducted at Sichuan University West China Hospital concluded that Wentang Rice has a glycemic Index of 63, approximately 25% below that of ordinary rice. Three month clinical trials conducted at Sichuan University West China Hospital showed that the average fasting plasma glucose of patients with type 2 diabetes which substituted Wentang Rice for ordinary rice was 0.4 mmol/L lower than that of the control group which continued to eat ordinary rice. Subjects who ate Wentang Rice as opposed to ordinary rice showed significant improvement in their blood sugar levels within one month with a return to normal blood sugar levels after two months of substituting Wentang Rice for ordinary rice. Continued reliance upon Wentang Rice allowed many patients to reduce the amount of prescription medicines used to control their blood sugar levels.

The Distribution Agreement has a sales target for the next twelve months of 250,000 KG of rice generating sales revenue of US\$1,500,000 (approximately RMB10,200,000) and gross profit to Aixin of US\$500,000 (RMB 3,400,000). The suggested retail price of Wentang Rice is 65 yuan/Kg, about 50% higher than the cost of ordinary rice.
