Dr. Yong-Woong Jang developed and applied for a patent for a “magnetic rotating device” that saves more than 60-70% of electricity through energy saving research for over 40 years. Through this agreement, Laredo Resources Corp will transfer 100 million shares of OTC registered stocks and establish spc corporation with 50-50 shares with Dr. In addition, based on all the intellectual property rights related to the generator of Dr. Yong-Woong Jang, such as an energy saving system using a patented generator magnetic rotating device, it is expected to be used in all places where electric power is required.

Dr. Yongwoong Jang's patented rotary driving device using magnetic force is classified as eco-friendly energy such as solar, wind and hydropower. It is evaluated as an innovative electric energy saving system that can contribute to the policy to suppress fossil fuels, which is the main culprit of global warming such as hydrogen energy. On the other hand, the spc corporation to be established this time plans to play a social role as a company that practices love for neighbors by donating 10% of the profits obtained from the business to the "Grain of Love Foundation".
