Managements' Q1 2015 Discussion

NOTE: The Company uses all of its free cash flow from operations to reinvest back into growth. Shareholders should expect that all available liquid resources will be redeployed into growing its business and **NOT retained as profit**.

During Q1 2015, the Company continued to focus on its level 1 websites and its two real world retail stores. In Q1, the Company began a number of initiatives to increase its sales per square foot which it expects to be completed late in Q2 or early Q3 2015. Both retail locations are also used as primary warehouse facilities for its online businesses. The majority of the Company's efforts are placed in Level 1 websites with a continued focus on websites that drive the most revenue in conjunction with its retail store fronts.

The Company drives traffic to its websites using organic search results, paid ads as well as focus and attention to customer retention through the following:

1. Premium Membership Program
2. Enhanced Customer Email Harvesting
3. Refer a Friend Program
4. Loyalty Rewards Program
5. Weekly Emails

Website Directory

Level 1: Websites on level 1 are on full attention detail with resources and efforts deployed for these websites to derive revenue. These websites are fully operational, product populated and full marketing and inventory efforts are in place.

Level 2: Websites on level 2 are sites that are in the mid stage of development. These websites are slowly being populated with product and increasing their keyword rankings (SEO) on Google, Bing and Yahoo for organic traffic generation.

Level 3: Websites on level 3 are sites that are in early stages of development with regards to source code, SEO with little to no product population as of yet. These are infant websites however, the url is active and live.

Since the Google Panda May 2014 release, the main determining factor in SEO is the age or the length of time an url has been live which means that Bravada launches its websites as soon as possible to begin the process of being crawled by the major search engines. This timeframe is now 12-18 months as a result of the May 2014 Panda 4.0 Google implementation.
