Growth Rate

Revenue Growth Chart

No Borders Inc has exhibited a steady growth rate of over 30% per quarter over the last year, with the average for the previous three quarters being roughly 76%. This trend shows some signs of weakening due to the reduced quarterly growth, 1Q19 growth was 100% over FY 18, 2Q19 was 94% over 1Q, and 3Q19 was 34% over 2Q. This may indicate current market saturation for targeted

demographics and marketing campaigns and may highlight a need to expand into new marketing areas, technology, or verticals.

Intellectual Property

No Borders, Inc has continued to demonstrate a willingness to protect their intellectual property by filing trademarks and patents for what they have developed. The analyst was only able to locate eight filings within the trademark and patent system. It is unclear at this time how many filing No Borders has applied for or been approved for.

As No Borders continues to grow, it may become advisable for the company to publish a running list or tally of applied or approved patents and trademarks. In addition to this product updates for any released and protected software and services.
